WORK EXPERIENCE

Mercedes-Benz.io

Senior Frontend Engineer

June 2024 -
Porto (Remote)

I have been working on Connect Store, an e-commerce site selling connected services and on-demand products. Our goal is to ensure a smooth rollout of digital services and products to digitalize the Mercedes-Benz ecosystem.

Inside the Connect Project, I worked in two different teams:

- The first one was responsible for building new features, and the team composition had four backend developers, three frontend developers, two QA analysts, a SM, and also PO.
- While the other team was basically made up of six frontend developers responsible for the whole application, two QA analysts, a designer, ITC, SM, PO and PM.

Project stack: Vue.js (Options and Composition API), Nuxt (BFF), Vitest for unit tests, Storybook, Datadog for monitoring, FIGMA as the design tool.

We use SAFe Scrum as an agile method, and all meetings like Daily, Planning, etc.

FARFETCH

Senior Frontend Engineer

June 2022 - Feb 2024
Porto (Hybrid)

As a senior software engineer on the FPS team, I am involved in the rewriting process of their digital solutions using technologies such as Next.JS, Remix, and Typescript.

Furthermore, I closely worked with the head of

engineering to further develop strategic technical solutions for FPS products.

Development of an E-commerce Project for an American fitness footwear and clothing brand.

Created the project foundation with support to Session, Internationalization, and Logs implementation (New Relic and Logz.io).

I was part of the team responsible for the Go Live step. Created documentation about all new features. Stack: Remix (framework based on React), Typescript, remix-i18n, Express, Redis, Jenkins, Octopus, Docker, Unit test (Jest). Observability and Monitoring using New Relic and Logz.io.

Development of a Multi-tenant project for a big luxury fashion group. A mono repository was responsible for handling different companies of the group. Stack: React, Typescript, Internal Boilerplate using the company Design System, Razzle (to handle several projects), Webpack, Jenkins, Unit test (Jest).

Created a presentation to teach team members company standards and best practices in Next.js and Strapi. This helped the build of a new internal portal for developers.

Scrum routine: refinement, planning, daily, review, retrospective.

Mindpool

Senior Frontend Engineer

Oct 2021 - May 2022

Remote to Denmark

Developed a new website company from scratch: mindpool.com (the old version can be accessible here: <https://web.archive.org/web/20220521180126/https://www.mindpool.com/>) Used Strapi for the content management system.

Created the user experience that fetched, parsed, and formatted analytic data, and relayed it into React components.

Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience. Stack: NextJS, Strapi, styled-components, Typescript, Jest, React Testing Library, and Storybook.

Talks with the designer and stakeholders to better understand the business rules and UX.

Scrum routine: refinement, planning, daily, review, retrospective.

Accenture / Concrete Solutions

Senior Frontend Engineer / JavaScript Chapter Leader

February 2017 - October 2021

Belo Horizonte, MG - Brazil

Developer Lead, knowledge sharing, mentoring other developers to improve their technical skills, helping with interviews, and analyzing challenges.

Development of a Brazilian global personal care cosmetics group's project:

Developing setup for new countries for Latin America expansion to support all consultants from those new places.

Given support to the backend team on Express, Knex, and PostgreSQL.

A highlight there was the performance improvement after a checkout page refactor.

It created new components, reduced the dispatch call to several actions on the Redux side, and used React Lazy and code splitting to get 0.15 points on Apdex.

Stack: Express, Knex, PostgreSQL, Unit tests (Jest), React, Redux, Material UI, git, Jenkins, Kibana.

Development of PWA for an NGO.

It created a PWA in React to handle the data from cards that community leaders received. Some features like getting the location from Navigator API, photo upload, and API consuming.

Supported the backend team helping with payload creation. Development of CRM and Back Office to support a mobile application (Digital Bank).

Stack: React, GraphQL, Jest, hooks, Redux, styled-components, prop-types.

Refactor of a Brazilian bank project.

It helped the QA team with selectors to use on the Cucumber tool. Stack: AngularJS, WebPack, ES6, Babel, Unit tests (Karma), API data, CI, Git, CSS Modules, Standard javascript style guide, and Bootstrap.

Scrum routine: refinement, planning, daily, review, retrospective.

Stefanini

Senior Frontend Engineer / Tech Lead

June 2016 - Jan 2017

Belo Horizonte, MG - Brazil

Besides developing several projects, I was a leader to three other developers, two interns, and one junior developer.

I learned about XAML and how Xamarin works because I had to integrate it with C#. Some projects I used: AngularJS, and Bootstrap.

Scrum routine: refinement, planning, daily, review, retrospective.

Hotmart

Frontend Developer

Nov 2014 - Apr 2016

Belo Horizonte, MG - Brazil

I worked on the new platform with Rest API and Meteor integration, Bootstrap layout, and grid.

Given maintenance on old monolith projects.

On the release of the new platform, we created A/B tests, and feature toggles related to user types, if producer, affiliate, or buyer.

Scrum routine: refinement, planning, daily, review, retrospective.

CI&T

Frontend Developer

Oct 2013 - Nov 2014

Belo Horizonte, MG - Brazil

Customized Primefaces JSF frameworks to work in Internet Explorer 8. The client wanted some features to work in IE8 that caused trouble and didn't work, for this I had to rewrite some functions. Stack: HTML, CSS, vanilla JS, and Primefaces for JSF.

Scrum routine: refinement, planning, daily, review, retrospective.

Plan B Comunicação

Frontend Developer

Jul 2012 - Sep 2013

Belo Horizonte, MG - Brazil

useInternational LTD

Frontend Developer

April 2010 - Jun 2012

Belo Horizonte, MG - Brazil

The first contact with Scrum methodology.

Developed HTML, CSS, and JS, integrating code from the layout to JSF.

Scrum routine: refinement, planning, daily, review, retrospective.

Meritia

Frontend Developer

Apr 2007 - Nov 2008

Belo Horizonte, MG - Brazil

Sense8

Frontend Developer

April 2009 - Mar 2010

Belo Horizonte, MG - Brazil
